Run Button   Key Entry

1 Function Selection

Buttons to choose between Encrypting and Decrypting functionality. Clicking button will take you to other menu.

2. Key Entry

Text box to enter key to be used. Key must be a positive whole number. The same number used to encrypt must be used to decrypt.

3. Message Entry

A text box to enter your message. The entered message is what is stored in the image after encryption. Unicode is not supported.

4. Choose Image Button

Select the image to have a message stored in, or retrieved from. File type restricted to PNG and JPG. Transparency is not supported.

5. Run Button

Once all the fields are entered, press the button to run the application.
